8097872267

Full-stack Developer with over 7 years of professional experience constructing end-to-end solutions across diverse business domains, complemented by leadership skills. I have thrived in diverse work environments, spanning the fast-paced **service industry** to the quality- and scale-focused **product industry**, as well as successfully delivering **freelance** projects single-handedly.

Skills

- **Front-end:** React, Next JS, SASS, Typescript
- **Back-end:** Node JS (Sails, Fastify)
- **Database:** MongoDB, MySQL, Postgresql
- **Development:** Unit testing (Jasmine, Jest, Vitest), Chrome Dev Tools
- **Infrastructure:** ELK stack, Redis, SQS
- **Architecture:** Microservices, Monorepo
- **DevOps:** Dockers, CI/CD pipeline, AWS
- **AI:** RAG, Gen AI

Work Experience

[KGL](#) | [Tweddle](#) / Associate Technical Architect

MAR 2024 - now, Mumbai, India (Hybrid)

Build a **SAAS** product from scratch that offers product support solutions for global OEMs. I was responsible for evaluating different technologies, building POCs, and making design decisions for the product.

- Established a **monorepo** architecture using **Turborepo**, enabling modular development and reusable components.
- Develop a backend framework on top of Node JS with a focus on **Clean Architecture** and **Vertical Slicing** to ensure clear separation of concerns and maintainable code.
- Build an AI-powered search using **RAG** to demonstrate an intelligent content search leveraging semantic understanding.
- Designed and implemented a **feature flagging and provisioning** system with role- and permission-based access control.
- Build and publish **NPM packages** to GitHub
- Implemented **Analytics framework**
- Integrated Sequelize ORM for database queries and migrations.
- Other infrastructure and tooling tasks include - setting **Unit/Integration testing** using **Vitest**, **localization** support using **i18next**, **Swagger**, **MUI** component library, etc

[Wysa](#) / Senior Full Stack Engineer and Pod Lead

MAY 2021 - JAN 2024, Bangalore, India (Remote)

Worked on a **mental health** product with over **5 million users**, **50k MAU**, and approximately **2k concurrent users**.

- Plan **tech roadmap** and oversee **product delivery** and **maintenance**.
- **TRD** and **PR reviews** and setting appropriate development practices.
- Write **data pipelines**, and contribute to **internal tools**.
- Participate in platform improvement tasks like **upgrading deprecated libraries/tools**, and **refactoring legacy code**.
- Maintain and resolve any issues related to the **Dev** and **Staging** environments.
- Develop features that would typically require writing REST APIs in **Sails** while effectively using **Redis**, **SQS**, and **ELK** and third-party integrations such as **NHS**, **Garmin**, etc.

BGauss / Technical Consultant and SPOC

OCT 2020 - MAY 2021, Mumbai, India (Hybrid)

Worked with **BGauss**, an electric automobile company with a PAN India presence and over **500 unit sales every month**.

- **Coordinate** with **5-7 vendors** for product delivery and maintenance.
- Build a **platform for real estate** administrators, brokers, and their sales teams to efficiently manage microsites, leads, and team activities. Details [here](#).
- Manage their cloud infrastructure on **AWS**, **Mongo Atlas**, **GoDaddy**, etc as well as their **Google Business accounts** and marketing tools like **SendGrid**.

Sankey Solutions / Solution Lead

AUG 2016 - APR 2020, Thane, India (On-Site)

Gained experience in **full-stack web development**, working on multiple projects and technologies and developing **leadership** skills.

- Write **APIs** and build features in Node JS by utilizing **micro-services architecture**, **database migration**, different **authentication mechanisms**, etc.
- Build responsive websites and PWAs using frameworks like **React**, **Angular**, etc, and development tools like **Chrome Dev Tools** and **LightHouse**.
- Build **POC** (Proof Of Concept) projects that demand a technology-agnostic approach, and fast learning capabilities.
- Involvement in the **end-to-end product lifecycle** from ideation, designing wireframes, and creating project plans to product delivery and maintenance.
- Managed **cloud infrastructure** for multiple projects, gaining exposure to **AWS**.

Education

K J Somaiya College of Science and Commerce (Mumbai University) / Bachelor of Science in Information Technology
JUN 2013 - MAR 2016, Mumbai, India

CGPA: 5.8 | Grade: B

Achievements

Bar Raisers at Sankey Solutions

Drawing upon my technical expertise, soft skills, and aptitude for learning, I was appointed as a Bar Raiser.

First prize at Game of Tech Titans

I led a team in developing a **Digital Signature Platform** during a two-month internal technical event at Sankey Solutions.

Appreciation token for work

Twice recognized for timely project delivery, receiving tokens from both the client and the CEO.
